ChapterGrabber 0.36.0 Download [32|64bit]

ChapterGrabber is a lightweight software application whose purpose is to help you extract chapter titles and times from DVD, HD-DVD and BD, search for chapter names in an online database, and adjust the framerate. Portable running mode The portable status of this utility allows you to store it on USB flash drives or other portable media devices and carry it with you. There's no setup included in the process, as you may simply open the tool by running the executable file. It doesn't write entries in your Windows registry so you may get rid of it by deleting the files that you have grabbed from the Internet. User-friendly looks and importing/exporting options A help manual is not included in the package but the GUI looks intuitive so you won't spend too much time with setting up the entire process. You may import the information from IFO, XPL, MPLS, TXT, XML, or CHAPTERS file format, read the chapters from a DVD, HD-DVD or BD, or make the application process the files included in a custom folder. The tool also keeps a list with recently used files. When it comes to exporting options, the application lets you save data to XML, TXT or CHAPTERS file format. The extracted chapter text can be used when muxing MP4, M4V and MKV files. Chapter editing features ChapterGrabber lets you look for chapter names and grab the information from an online database. In addition, you may manually edit the title or paste data from the clipboard. You may add multiple chapters, change their order by moving items up or down, delete the selected chapter, adjust the framerate, add delay to all chapters, reset the names, and change the language. What's more, the application lets you set up database credentials, import duration details and names, ignore short last chapter, sync online database, as well as check valid title upon saving. Bottom line All things considered, ChapterGrabber delivers an intuitive layout and handy features for helping you extract chapter times and titles, and can be handled by all types of users, regardless of their experience level.
