Like other reviews, I bough this thinking it would be a nice addition to my collection. I was wrong. I tried it out and found out all the sounds (engine sound, horn, AND bell are all recycled from the BN/BNSF GP38-2. I know you can change it, but still is very annoying they didnu2019t change it. There are also a couple issues with the cab controls (the brake lever Dosent work). If you want it, I recommend getting it during a sale, itu2019s not worth itu2019s full price..
